***Specification***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Claims 1-17 were originally filed. It appears that Applicant is replacing those claims with new (misnumbered) claims 1-7. Consequently, claims 1-17 will be treated as if canceled and new claims 1-7 have been renumbered 18-24.

The specification does not include reference numerals that refer to the like numerals in the drawings so as to adequately describe the invention. Please note the drawings and specification of the patents cited herein.

The page listing the new drawings is not indicated as an amendment, addition, etc. If such is an amendment to the specification, it must be indicated.

***Claim Rejections - 35 USC § 112***

Claims 18-21,23 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The "standard" drapery pin, tethering strap, elastic chord and magnets are not part of the original disclosure.

Claims 18-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are replete with errors too numerous to mention individually. Examples are: the reference to drawing figures is improper; narrative and subjective terms such as "sturdy" are improper; the term "standard", in reference to the drapery pin, is indefinite; in claim 21, it is not clear if the screen is part of the kit since the kit is "for" a screen; there is no antecedent basis for "said binding"; the use of a Markush claim to recite steps of a method is improper; claim "6" (now claim 23) depends from itself; etc.

### ***Drawings***

The drawings are objected to because they do not contain reference numerals (see above). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date

Art Unit: 3634

of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

Claims 18 and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Saulters.

Saulters discloses a hook and loop attachment system for attaching a screen to a fixed structure.

***Response to Amendment***

Applicant has not presented arguments regarding the first office action. As indicated above, the amendment has substantial problems. There appears to be several new features introduced in the amendment, thus prompting a "new matter" rejection, discussed above. It appears that the originally disclosed invention is anticipated by prior art references, such as Saulters, Tollivar, Neer, Vesey, etc.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3634

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
